

EST. 2018 · INDIA · MIDDLE EAST · EUROPE

Grow together.

A diversified, multi-vertical holding company from India
— building, backing, and operating durable businesses
for the long term.

CAPABILITY OVERVIEW · Somras

SPIRIT · If you want to go far, go together.

SOMRAS 

A holding company, built to last.

Somras — from *soma-rasa*, the elixir of growth — builds, backs, and operates businesses across five verticals and several markets. We are patient by temperament and long-term by design: we own for decades, not quarters, and measure success in durability.

Build. Back. Operate.

Build

We start and grow our own businesses — from trade to real estate to proprietary technology.

Back

We invest in founders with proven technology, bringing patient capital and operating experience.

Operate

We stay involved — running and stewarding what we own for the long term, not flipping it.

Five verticals, one group.

TMT

Technology, media & telecom — the connective tissue of a networked world.

Venture Fund

Early-stage capital for proven technology solving real-world problems.

Advisory

Strategic & financial counsel for foundations, sovereign bodies & founders.

Trade

Cross-border trade across the Middle East, Europe & North Africa — our founding forte.

Real Estate

Durable, income-generating property — acquisition and development.

Anchored in India, active across markets.

CORE

Middle East & Europe – UK, Germany, France,
Spain, Italy

HOME

India – where the group is founded and anchored

ALSO

North Africa – through our trade network

We don't just back technology – we build it.

Beyond investing, Somras develops its own proprietary technology: the platforms and infrastructure for a more connected world by 2040. It is a discipline we practise ourselves, which is why we understand what it takes to make technology genuinely work.

WHAT WE LOOK FOR

We back technology that already works.

GATE 1 • TRL 7-8

Proven technology

On NASA's Technology Readiness scale, a system prototype demonstrated — and proven — in its operational environment. The technology risk is behind us, not ahead.

GATE 2

Demonstrated fit

Genuine product-market fit — real customers, real usage, and a real-world problem being solved in the market today.

We invest **after** both gates are cleared — technology at **TRL 7-8** with proven fit, and founders who have de-risked it before we scale capital behind them.

The frontiers shaping the next decade.

We partner thematically — drawn to durable, real-world problems in the sectors that will define how the world works and connects.

Surya Phadke

Founder & Managing Director

Operator by trade, builder at heart. Surya founded Somras in 2018 to invest in and operate across India, ASEAN and MENA, after building a manufacturing and distribution group of his own.

INSEAD • Wharton — MBA

ITF Masters Tennis • Former Trustee, Make-A-Wish India

GROW TOGETHER

Let's build something durable.
