

Grow together.

A diversified, multi-vertical holding company from India. We build, back, and operate durable businesses across five verticals and several markets — patient by temperament, long-term by design.

THE FIVE VERTICALS

TMT

Technology, media & telecom — the connective tissue of a networked world.

Venture Fund

Early-stage capital for proven technology solving real-world problems.

Advisory

Strategic & financial counsel for foundations, sovereign bodies and entrepreneurs.

Trade

Cross-border trade across the Middle East, Europe and North Africa — our founding forte.

Real Estate

Acquisition and development of durable, income-generating property.

WHERE WE OPERATE

CORE

Middle East & Europe — UK, Germany, France, Spain, Italy

HOME

India — where the group is founded and anchored

ALSO

North Africa — through our trade network

IN-HOUSE TECHNOLOGY

Beyond investing, we develop our own proprietary technology — building the platforms and infrastructure for a more connected world by 2040. Technology is not only something we back; it is something we build and operate ourselves.

WHAT WE LOOK FOR

Our venture practice backs *early-stage* companies whose technology already works — proven in the real world, not just the lab.

GATE 1 · TRL 7-8

Proven technology

On NASA's Technology Readiness scale, a system prototype demonstrated — and proven — in its operational environment. We invest once the technology risk is behind us, not ahead.

GATE 2

Demonstrated fit

Genuine product-market fit — real customers, real usage, and a real-world problem being solved in the market today.

We invest **after** both gates are cleared — technology at **TRL 7-8** with proven fit. Experience has taught us to back what already works, and founders who have de-risked it before we scale capital behind them.
